Student tutoring

– Helping you to integrate

All international students and trainees at Lappeenranta University of Technology are appointed a tutor who is a student at LUT. Your tutor will be waiting for you when you first arrive in Lappeenranta and he/she will take you to your flat. Your tutor will help you with practical matters such as getting to know the Finnish student housing and customs, settling in at the university, opening a Finnish bank account etc.

The student tutor is your contact person to the Finnish society, culture and university life. Keep in touch with your tutor during your studies and ask for help with any questions you may have. Hopefully your tutor will also become your first friend in the new environment. You should still remember that your tutor is not your new mum or dad – you still have to do your own laundry.

If you have any questions about tutoring, please contact the International Services of LUT:

Host family programme

– Getting to know the Finnish way of life

International students coming to Lappeenranta University of Technology for autumn semester/ academic year have a chance to participate in the Host Family Programme. The programme brings together international students and South Karelian families. The aim is to help foreign students to learn more about the Finnish culture and family life. In return, the students give the host families a greater understanding and appreciation of other cultures.

The Host Family Programme is voluntary, so the students and families decide themselves how often they meet and what they do together. You may meet once a month or even every week and cook together, go swimming, skiing or to a basketball game – it's all up to you and the family.

The programme is coordinated by the international offices of Lappeenranta University of Technology and Saimaa University of Applied Sciences and the Student Society of Lappeenranta Evangelical Lutheran Church.

For more information, please contact the Study Secretary of International Services or visit the website:
