PLEASE MARK THE CORRESPONDING AUTHOR WITH HIS/HER
EMAIL ADDRESS

Abstract. The abstract should summarize the contents of the paper using at least 70 and at most 150 words. It will be set in 9-point font size and be inset 1.0 cm from the right and left margins. There will be two blank lines before and after the Abstract. . . .

Keywords: First Keyword, Second Keyword, Third Keyword, Forth Keyword, Sixth Keyword.

This document is a guide for Conference submissions. Please restrict your document to 10 pages for the full paper.

Page Size, Margins and Font

The page size is standard A4, with the margins listed in Table below. The document is based on the font Times New Roman. The standard font size is 10pt. The paper title is 14pt bold faced. Section titles are 12pt bold faced; subsection titles are 10pt italics. Figure and table captions are 9pt.

Page	Top	Bottom	Left	Right
First	5.0	5.6	4.7	4.6
Rest	5.0	5.6	4.7	4.6

1 First Section

Please note that the first paragraph of a section or subsection is not indented. The first paragraphs that follows a table, figure, equation etc. does not have an indent, either.

Subsequent paragraphs, however, are indented.

1.1 A Subsection Sample

Figures/Tables should be centred within the page width and numbered sequentially. Figures/Tables should be numbered separately. Multiple figures should be referred using letters (e.g. Fig. 1a or 1b).

In the text a figure/table is referred as “Fig. 1a shows the drag coefficient...” or “the slope of the lift coefficient switches from negative to positive at the critical Re (Fig. 1b)”.

Sample Heading (Third Level). Only two levels of headings should be numbered. Lower level headings remain unnumbered; they are formatted as run-in headings.

Sample Heading (Forth Level). The contribution should contain no more than four levels of headings. The following Table 1 gives a summary of all heading levels.

Table 1. Table captions should be placed above the tables.

Heading level	Font size and style
Title (centered)	14 point, bold
1st-level heading	12 point, bold
2nd-level heading	10 point, bold
3rd-level heading	10 point, bold
4th-level heading	10 point, italic

Displayed equations are centered and set on a separate line, and numbered sequentially. Equations must be referred in the text as “Eq. (1) defines strain sensitivity”. Equations must be referred in the text as “Eq. (1)” for one equation or “Eqs. (1), (2) and (3)” for multiple equations.

$$x + y = z \tag{1}$$

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. 1).

Fig. 1. A figure caption is always placed below the illustration. Short captions are centered, while long ones are justified.

For citations of references, we prefer the use of square brackets and consecutive numbers. Citations using labels or the author/year convention are also acceptable. The following bibliography provides a sample reference list with entries for journal articles [2], an LNCS chapter [3], a book [4], proceedings without editors [1], as well as a URL [5].
