

Pierre Dehombreux

Top International
Managers in Engineering

Pierre Dehombreux, born in Borinage in 1967, is full professor at the University of Mons and heads the Laboratory for Machine Design and Production Engineering.

His research focuses on predictive maintenance, combining physics-of-failure models, statistics, and degradation monitoring. He has led industrial collaborations with companies such as ALSTOM, ArcelorMittal, and Baxter.

Former Vice-Rector and Dean, he now serves as international advisor and T.I.M.E. delegate. He is also Vice-President of Pôle Mecatech and Treasurer of IAUPL. Full bio, [HERE](#). For a list of publications, [click here](#).
